

INTEGRATED SYSTEM POLICY

BKT ELEKTRONIK is the leading supplier and manufacturer of comprehensive solutions for the IT, ICT and electrotechnical sectors.

We offer a complete structured cabling system, products for constructing FTTx fiber optic distribution and access networks as well as server rack and modular unit systems for Data Centers.

In meeting the expectations of our clients, we offer products that conform to strict quality requirements, manufactured with the use of state-of-the-art technologies of making and minimize the environmental footprint of our business and products.

This we pursue through:

- *Analyzing our clients' needs and expectations*
- *Designing Structured Cabling Systems to guarantee the meeting of our clients' expectations*
- *Sourcing products and materials from suppliers guaranteeing the required quality of deliveries*
- *Striving for zero defectiveness of the products and materials sold*
- *Systematically increasing the qualifications of our staff*
- *Continuously improving the effectiveness of our Integrated Management System*
- *Reducing waste and consumption of resources*
- *Complying with statutory and other applicable requirements related to the environmental aspects of our business*
- *Building and keeping up the environmental awareness of our staff*
- *Continuously increasing client satisfaction.*

We pursue the above goals and undertakings by maintaining and improving the introduced system in compliance with the requirements of the below standards:

ISO 9001; ISO 14001

To effectively implement the Integrated System Policy, as President of the Board, I hereby declare to fully engage and inspire the entire staff to efforts for the achievement of the ensuing goals.

President of the Management Board
